

RESUME BUILDER WEBSITE

AS A PROJECT WORK FOR THE COURSE

INTERNET PROGRAMING LABORATORY (CSE 326)

NAME: CH.RAMACHANDRAREDDY SUBMITTED TO: BRIJENDER PAL SINGH

REGISTRATION NUMBER: 12309983

ROLL NUMBER: 17

SEMESTER: FIRST SEMESTER

**SCHOOL OF COMPUTER SCIENCE AND ENGINEERING
LOVELY PROFESSIONAL UNIVERSITY, JALANDHAR, PUNJAB, INDIA.**

DECLARATION

I hereby CH RAMACHANDERAREDDY Registration No. 12309983 declare that the project work reported entitled SOCIAL MEDIA PLATFORM in partial fulfilment of the requirement for the award of Degree for Bachelors of Technology in CSE at Lovely Professional University, Phagwara, Punjab is an authentic work carried out under supervision of my supervisor Mr **BRIJENDER PAL SINGH** . The content of this project represents authentic and honest effort conducted, in its entirety, by me. I am fully responsible for the contents of my project work.

StudentName:RAMACHANDRAREDDY

Registration Number: 12309983

****SOCIAL MEDIA PLATFORM FOR RESUME
BUILDER****

INTRODUCTION

Social media platform are online services that enables users to create and share content with a network of connections. These platforms facilitate the exchange of information , ideas, and multimedia content, fostering virtual communities.

BACKGROUND OF THE PROJECT

“Social Media Platform ” usually begins with identifying a need or niche in the market. Project teams conduct market research to understand user preferences, analyze existing platform.

In my website login form for artists registration form for new creatives , about page, home page, notification page etc.

CONCEPTS USED:

In the making of this project, we have used the concepts that have been taught to us in class and we have used those conceptual learnings to improvise it.

The concepts used are:

- 1) HTML 5
- 2) CSS
- 3) External CSS
- 4) Internal CSS
- 5) Javascript

1) HTML:

HTML is a markup language used for structuring and presenting content on the World Wide Web. It is the fifth and final major HTML version that is a World Wide Web Consortium (W3C) recommendation. The current specification is known as the HTML Living Standard. It is maintained by the Web Hypertext Application Technology Working Group (WHATWG), a consortium of the major browser vendors (Apple, Google, Mozilla, and Microsoft).

2) Cascading Style Sheets:

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML (including XML dialects such as SVG, MathML, or XHTML). CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

CSS is designed to enable the separation of content and presentation, including layout, colours, and fonts. This separation can improve content accessibility;

provide more flexibility and control in the specification of presentation characteristics; enable multiple web pages to share formatting by specifying the relevant CSS in a separate .css file, which reduces complexity and repetition in the structural content; and enable the .css file to be cached to improve the page load speed between the pages that share the file and its formatting.

3) External CSS:

An **external stylesheet** is a standalone .css file linked from a web page. Using external stylesheets, you can apply rules to multiple web pages. If you ever need to make widespread changes to your website design, a single change in the stylesheet can be applied to all linked pages, saving lots of time and effort.

4) Internal CSS:

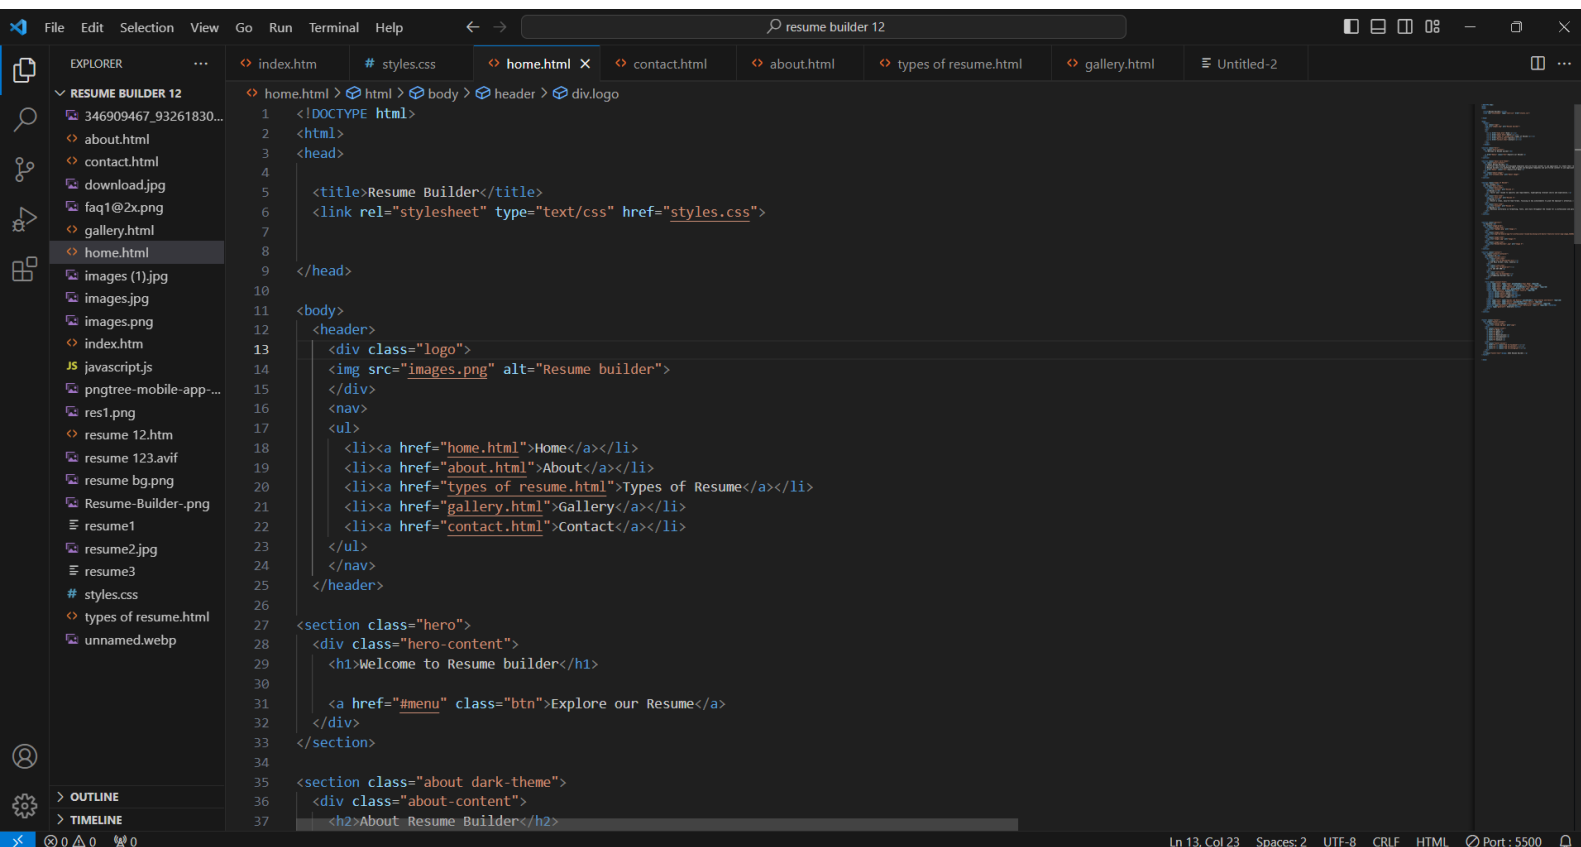

An **internal stylesheet** holds CSS rules for the page in the **head** section of the HTML file. The rules only apply to that page, but you can configure CSS classes and IDs to style multiple elements in the page code. Again, a single change to the CSS rule will apply to all tagged page elements.

we have made 12 sections on Our site:

- 1) Home page
- 2) About
- 3) Types of Resume
- 4) Gallery
- 5) Contact page
- 6) Reviews
- 7) Job
- 8) Carrer
- 9) Parttime
- 10) Women
- 11) Work From Home
- 12) Internship

These are the images of the code:

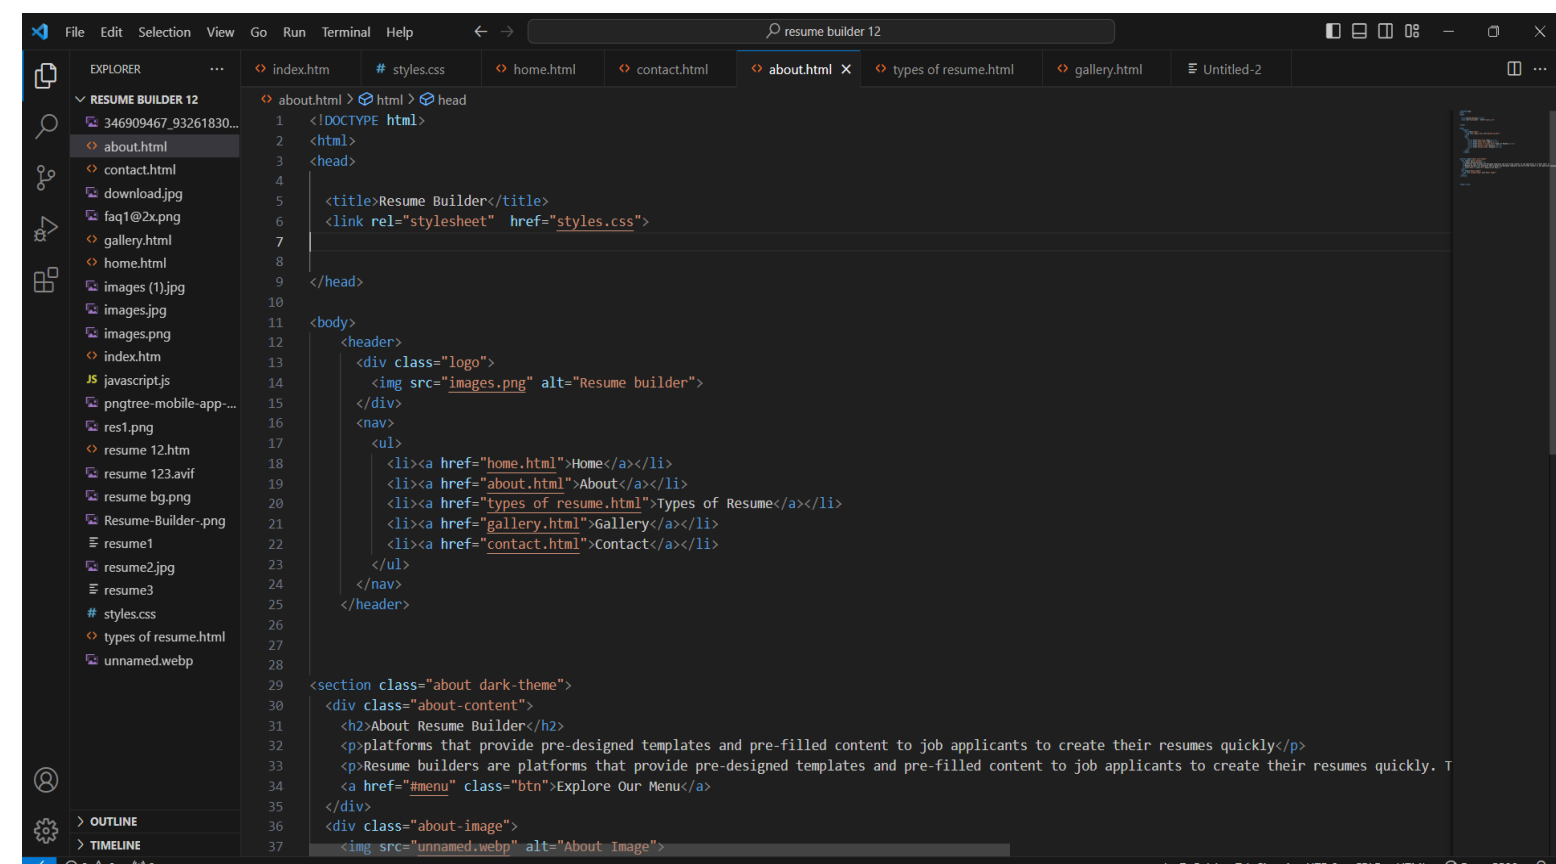

HOME PAGE

The screenshot shows the Visual Studio Code editor interface. The Explorer panel on the left lists files in the 'resume builder 12' project, including 'home.html' which is currently selected. The main editor area displays the HTML code for 'home.html'. The code includes a DOCTYPE declaration, a title 'Resume Builder', a link to 'styles.css', a header section with a logo and a navigation menu, a hero section with a welcome message and an 'Explore our Resume' button, and an about section with a heading 'About Resume Builder'.

Tags, Attributes, Conditions and Loops Used:

In this project we have used variety of tags, attributes, conditions and loops.

Some major tags are:

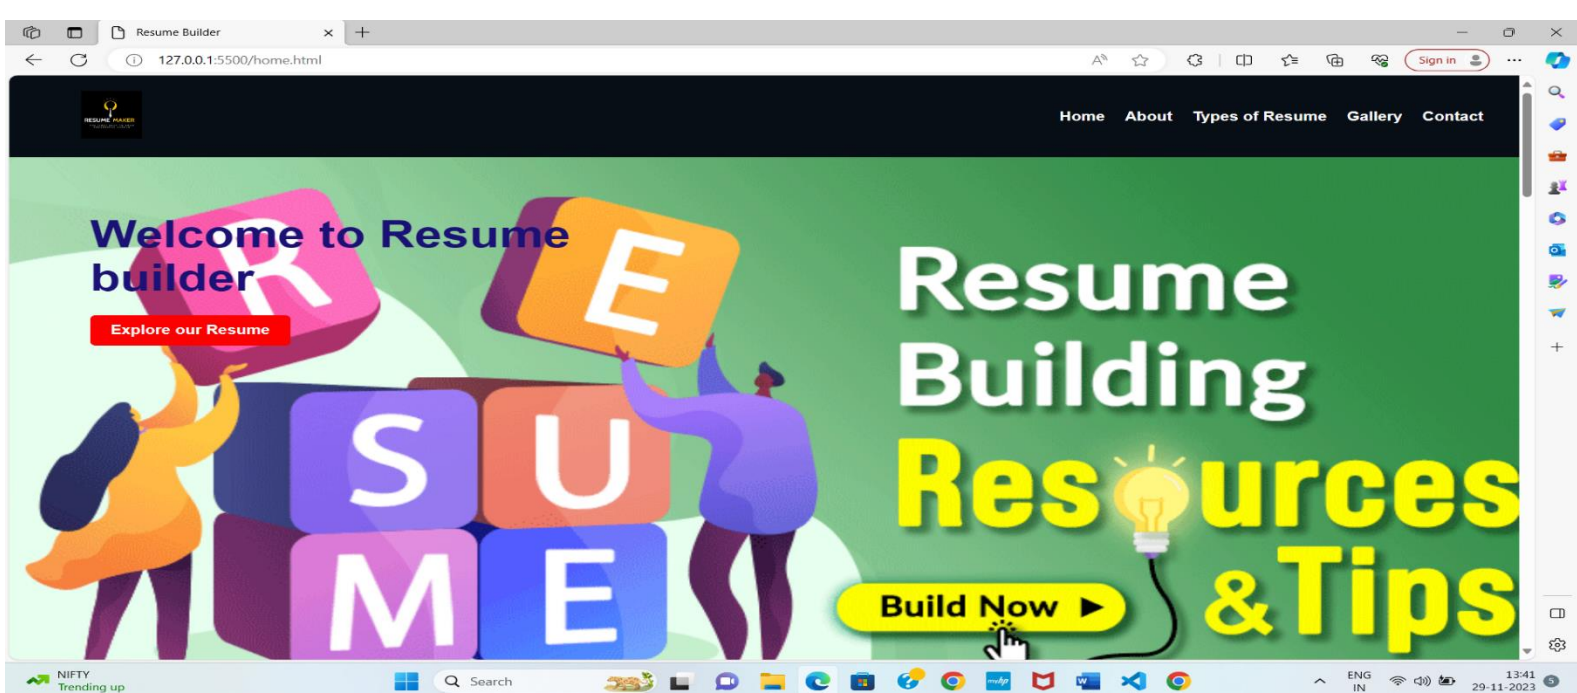

- 1) <script>
- 2) <link>
- 3) <style>
- 4) <div>
- 5)
- 6) <header>
- 7) <a>
- 8)
- 9) <center>
- 10) <button>, etc

In CSS we have used selectors such as:

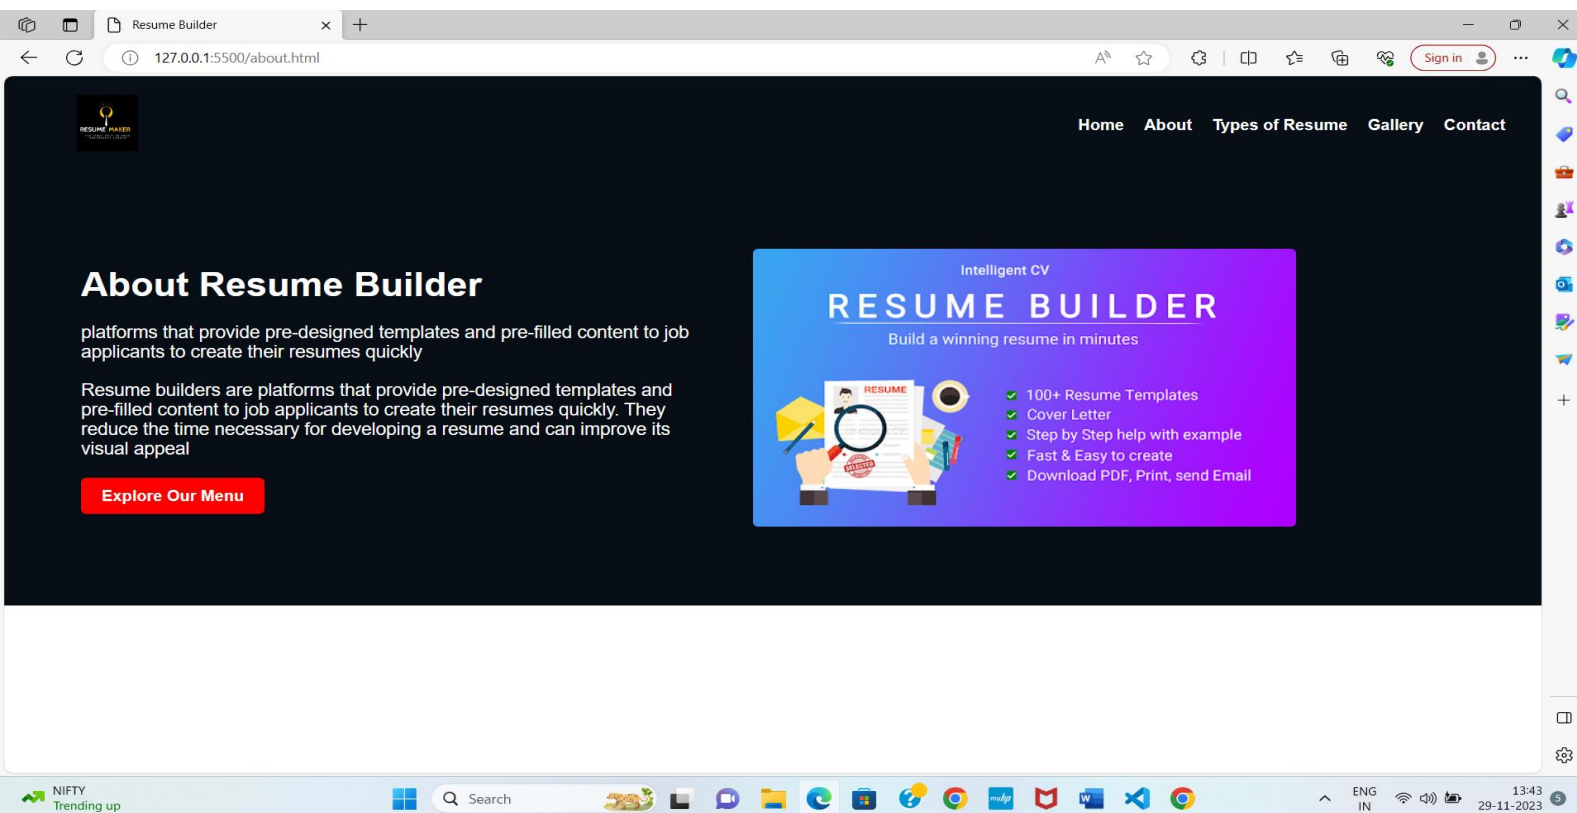

- 1) Id (#)
- 2) Class(.)
- 3) Element (with element name)
- 4) Universal (*)

Types of Resumes Page:

Gallery Page:

contact Page:

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:5500/contact.html'. The website has a dark blue header with navigation links: Home, About, Types of Resume, Gallery, and Contact. A 'Sign in' button is visible in the top right corner. The main content area has a blue background and is titled 'Contact Us'. It contains contact information: '123 Main Street, City, Country', '+91 8074881655', and 'info@Resume Builder.com'. Below this is a form with several input fields: 'Your Name', 'Your Email', 'Your Education', 'dd-mm-yyyy' (with a calendar icon), a country dropdown menu (currently showing 'India'), 'Your Awards and Honors', 'Your Skills', and 'Your Achievement'. At the bottom of the form, there is a gender dropdown menu (currently showing 'Male'). The browser's taskbar at the bottom shows various application icons, a search bar, and system status icons including NIFTY, ENG IN, and the date 29-11-2023.

THANK YOU

RESUME BUILDER

BY YOUR NAME : CH V S S RAMACHANDRAREDDY

SECTION-K23EP

REGISTRATION: 12309983

ROLL.NO: 17

EXPLANATION OF HOME PAGE AND ABOUT PAGE

- Create a welcoming and visually appealing section at the top of the home page.
- Include a headline or tagline that communicates the purpose of the website, like "Build Your Professional Resume with Ease."

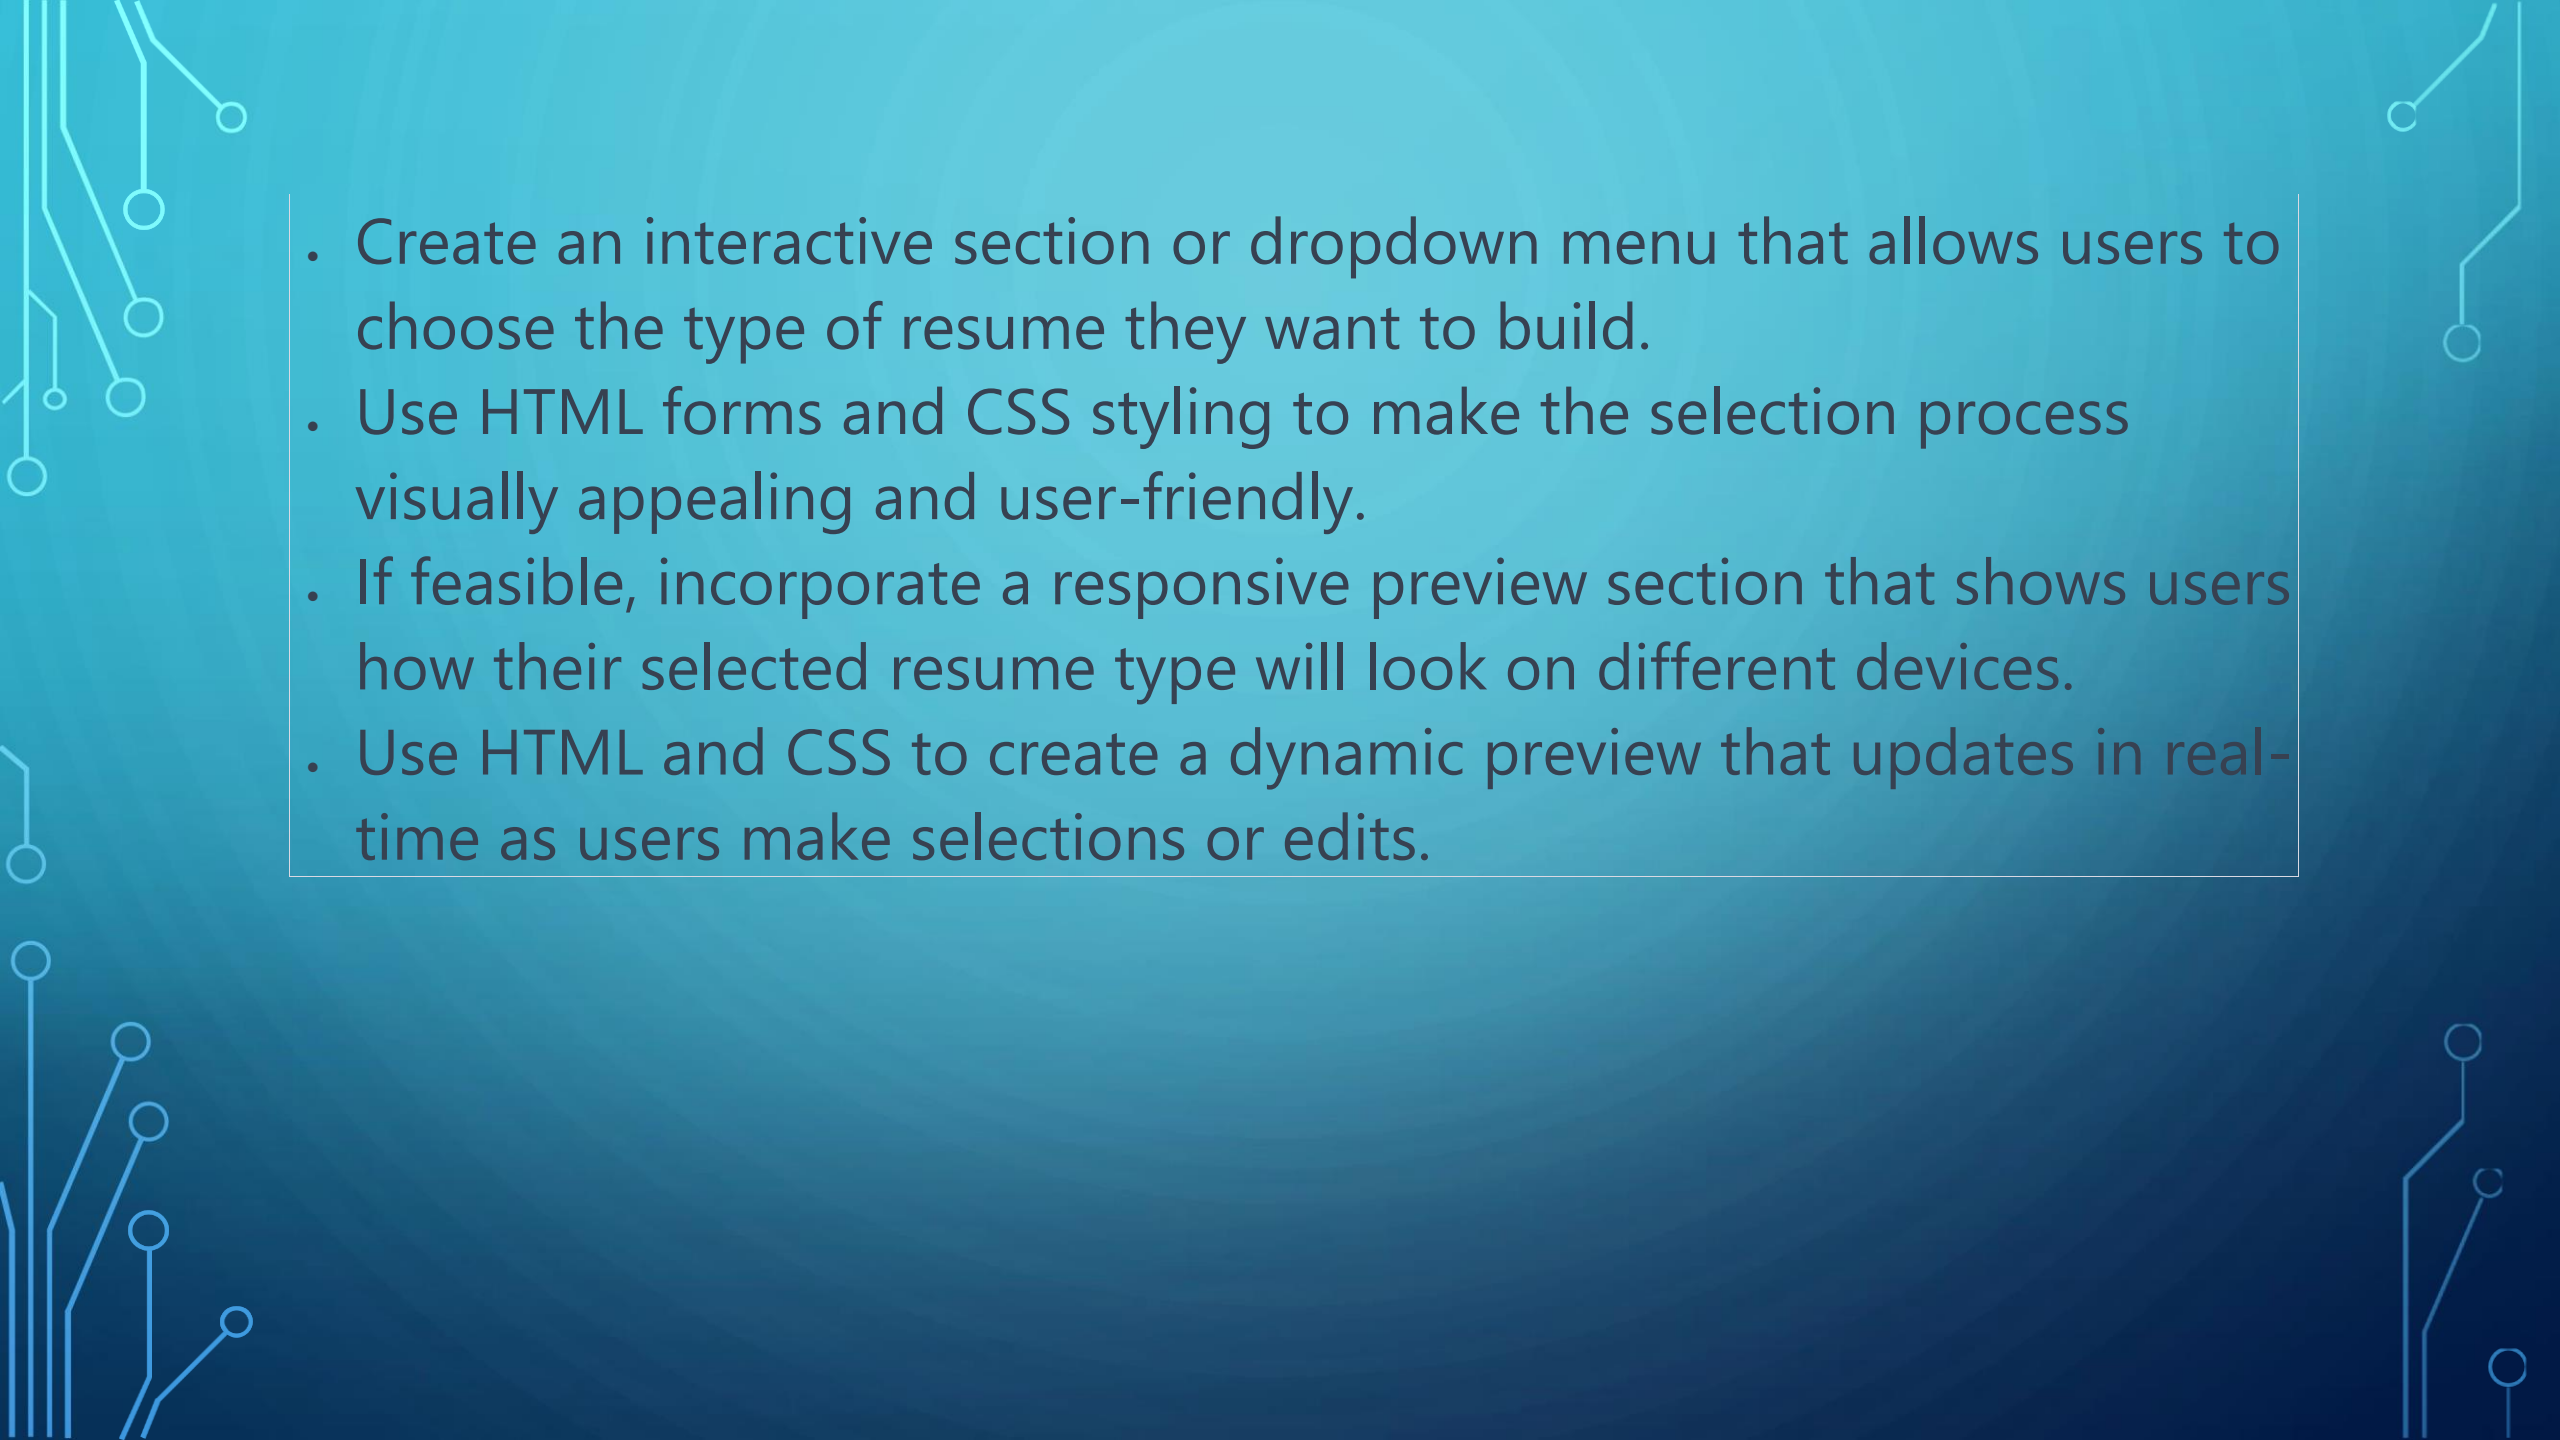

- Provide a brief description of the features and benefits of the resume builder.
- Use concise language to highlight key selling points, such as easy customization, professional templates, and user-friendly interface

*Display a selection of featured resume templates with thumbnail images.

*Include a brief description of each template's style and suitability for different professions.

EXPLANATION OF Types Of Resume

- **Provide** a brief introduction on the home page about the different types of resumes available.
- Mention the common formats, such as chronological, functional, and combination/hybrid resumes.

- 
- Create an interactive section or dropdown menu that allows users to choose the type of resume they want to build.
 - Use HTML forms and CSS styling to make the selection process visually appealing and user-friendly.
 - If feasible, incorporate a responsive preview section that shows users how their selected resume type will look on different devices.
 - Use HTML and CSS to create a dynamic preview that updates in real-time as users make selections or edits.

EXPLANATION OF Gallery

1.Portfolio Showcase:

- Include a visually appealing gallery section on the home page to showcase a portfolio of sample resumes.
- Display a variety of resume styles to provide users with inspiration and options.

2. **Filtering Options:**

- Implement filtering options in the gallery to categorize resumes based on different industries, job roles, or design styles.
- Allow users to easily navigate through the gallery and find examples relevant to their preferences.

Implement social sharing buttons or links to encourage users to share their favorite resume designs from the gallery on their social media profiles

EXPLANATION OF POST AND CONTACT

Make the contact information interactive, such as turning the email address into a mailto link for easy emailing.

Consider using icons or styling to make each type of contact information easily .

Ensure that the contact section is designed to be responsive, adapting to different screen sizes for a seamless user experience on various devices.

Course Detail

Provide a brief overview of the resume-building course. Highlight key objectives and what users can expect to learn.

Include a section that outlines the curriculum of the course. Break it down into modules or sections, and briefly describe the content covered in each.

Clearly state the learning objectives of the course. Let users know what skills and knowledge they will gain upon completing the course.

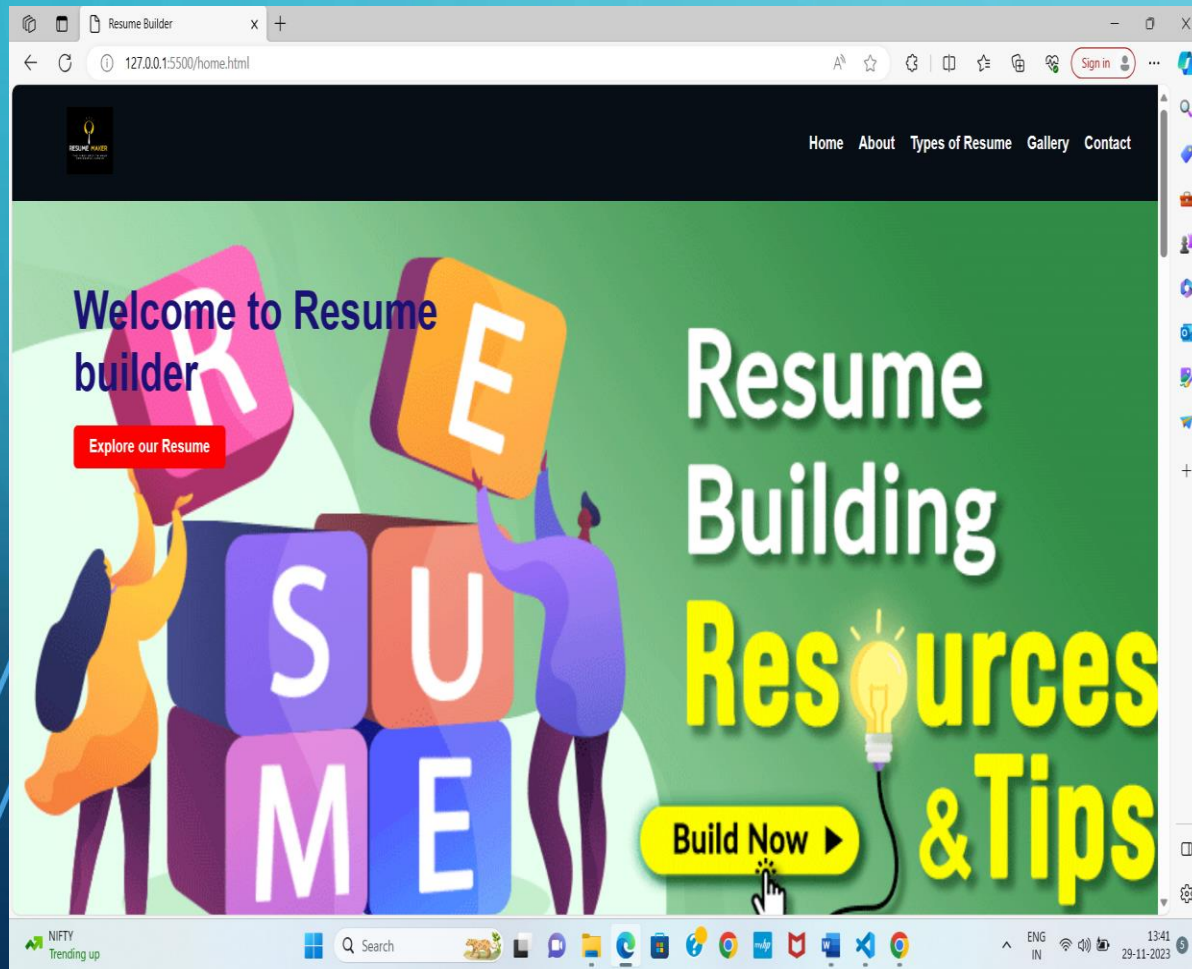

Provide clear instructions on how users can enroll in the course. Include any registration forms, payment details, or enrollment deadlines.
